Providing care during COVID-19

Queensland Webinar series

ASHM are delivering a webinar series exploring some of the key challenges and changes as we adapt to new ways of providing healthcare in Queensland.

The focus of the series is on workplace reform, telehealth, new models of care and the impact on service provision during the COVID-19 pandemic. Expert speakers will discuss the variety of adaptations and Medicare changes that have been rolled out in response to COVID-19, how service provision has been reimagined across remote, regional and metro areas of Queensland, and the challenges faced by impacted communities.

This series will also reflect on future challenges and opportunities, and the ongoing needs of the communities seeking care.

Sexual and Reproductive Health and COVID-19
