viral hepatitis & sexual health workforce

Hepatitis C Nursing

**Join us for this free training to support
your role in curing hepatitis C**

Online Training Session 1: Friday 30 April, 9:30am – 12:30pm (AEST)

Online Training Session 2: Saturday 8 May, 9:30am – 12:30pm (AEST)

Please note: You will need to attend both sessions in order to receive a certificate of completion.

This free facilitated online training course provides nurses and midwives with the knowledge and confidence to increase screening and management of hepatitis C in primary care settings.

Learning Objectives:

By the end of this training, participants will be able to:

- Describe risk factors for HCV, enabling discussions with patients around prevention
- Discuss HCV serology to identify opportunities for screening, testing and linkage-to-care
- Explain the nurse's role in providing culturally appropriate care, free from stigma and discrimination, to people from priority populations
- Explain the nurse's role in the management of chronic HCV, advanced liver disease and hepatocellular carcinoma
- Outline strategies for supporting patients with medication adherence

Learning objectives align with the AHA Practice Standards for the Hepatology Nurse (2015) and the AHA Consensus based Nursing Guidelines (2019). The course is also endorsed by the Australian Liver Association (ALA).
