

Early intervention; moving infants towards diagnosis before beginning school

For general practitioners

Northern Queensland Primary Health Network (NQPHN), together with the Mackay Hospital and Health Service, invite GPs to attend a combined paediatric - child psychiatry educational event.

This session will focus on the importance of early diagnosis and interventions in the mother and baby relationship.

Presenters

- Dr Veronica Stanganelli – Consultant Psychiatrist, Child, Youth Mental Health Service Mackay.
- Dr Jacinta Tobin – Clinical Director, Department of Child and Adolescent Health, Mackay Hospital and Health Service.

Learning outcomes

- Identify the importance of attachment between mother and baby.
- Identify the early warning signs of ASD during the first years of life.
- Identify early intervention, assessment and local referral processes during the first years of life.
