

Asthma and Respiratory Management Seminar

For practice nurses

Brought to you by the National Asthma Council Australia as part of the Best Practice for Health Professionals Program.

The Asthma and Respiratory Management Seminar provides role-specific education on best-practice asthma and respiratory management for nurses.

Starting with the principles of diagnosis and management, each session then covers current statistics, paediatric and adult asthma, allergy, medications, device technique, and COPD, followed by an overview of conducting spirometry in general practice.

Learning outcomes:

- increase knowledge and awareness of current, evidence-based best practice in asthma and respiratory management
- develop practical skills to support the use of evidence-based procedures and practices (e.g., device use, spirometry, patient education)
- learn strategies to incorporate this knowledge/skills systematically into routine clinical practice
- increase confidence in managing patients with asthma and linked chronic

Completion of this educational activity entitles eligible participants to claim up to 5 CPD hours.
