

Spirometry training

For practice nurses

Brought to you by the National Asthma Council Australia as part of the Best Practice for Health Professionals Program.

This Spirometry training course provides comprehensive training in the application, measurement, and interpretation of expiratory spirometry in general practice. This six-hour interactive workshop includes a practical, hands-on component to allow participants to apply their new knowledge in a practical setting.

Participants will be required to complete pre-reading.

Learning outcomes:

- increase knowledge and awareness of the role of spirometry in primary care
- develop practical skills to recognise and perform high quality spirometry
- understand interpretation and clinical implications of spirometry results, including differential diagnosis
- increase knowledge and awareness of the importance of spirometer quality assurance and its implementation
- learn strategies to incorporate spirometry testing systematically into routine clinical practice
- increase confidence in performing, understanding, and implementing spirometry.

Royal Australia College of General Practitioners (RACGP): Allocated 40 Category 1 points in the QI&CPD Program for the 2020-2022 triennium.

Australian College of Rural and Remote Medicine (ACRRM): Accredited by ACRRM as an educational event for 30 PRDP points.

Completion of this educational activity entitles eligible participants to claim up to 6 CPD hours.
