

Setting up access to AIR for your organisation

How you set up your access to AIR depends on how we recognise you as a user.

You can use practice management software to send data about vaccines to AIR.

If you don't have practice management software and need to view data held on AIR, you can access the AIR site using [HPOS](#). You'll need an individual [PRODA](#) account to access HPOS.

Using HPOS, you can set up your access to AIR in a few ways:

- as a [medical practitioner, midwife, or nurse practitioner with a Medicare provider number](#)
- as the [delegate of a medical practitioner, midwife, or nurse practitioner](#) with a Medicare provider number
- as a member of a [medical practice, pharmacy, or organisation with an AIR provider number](#)

NQPHN acknowledges the Aboriginal and Torres Strait Islander peoples as Australia's First Nation Peoples and the Traditional Custodians of this land. We respect their continued connection to land and sea, country, kin, and community. We also pay our respect to their Elders past, present, and emerging as the custodians of knowledge and lore.
