

CPD

Wound Management Update

About the course

The course is designed for registered and enrolled nurses from all health sectors, as well as for clinicians working in Allied Health, Podiatry and Pharmacy. This is an interactive program which incorporates focused group discussion and small group case-study based activity. It is conducted over two days and is equivalent to 14 continuing professional development (CPD) hours.

Presenter Biography Gary Bain RN CNC MClined BN DipApSc MACN.

Gary has been involved in delivering and teaching wound management since 1987. Currently in private practice as The Wound Guy, Gary provides education to medical, nursing, allied-health and product-industry personnel. He also provides clinical support to patients and their clinicians in the aged care, primary care and community sectors. These activities are conducted concurrently with his present role as educator and nurse consultant in wound management at the Mt Wilga Private Hospital (Rehabilitation Centre). He is also a lecturer at Macquarie University with the Australian Lymphoedema Education, Research and Treatment division.
