

IS HE REALLY INFERTILE?

Let's talk about sperm

The Education Program in Reproduction and Development (EPRD), Department of Obstetrics and Gynecology (OBGYN) at Monash University together with Healthy Male are excited to offer a new short course about male fertility. The course will provide essential and advanced knowledge in the field of male infertility and its management, focussing on its prevalence and causes. Conventional semen parameters will be discussed in context with the World Health Organisation guidelines (WHO) and the recent WHO 6th edition guidelines to explain the changes in reporting and interpreting. Standard and new prospective treatment strategies in assisted reproductive technologies will be presented.

PARTICIPANTS

This course is designed for General Practitioners, RANZCOG fellows and trainees, IVF specialists, sexual health and family planning staff, pathologists and reproductive scientists.

SESSION TITLES

- Male infertility - from practice to controversy.
- The ins and outs of semen analysis in 2022.
- The decline in sperm quality and how we deal with it.
- Case studies in male infertility.
