

CHQ Paediatric Palliative Care Service & the QuoCCA project present -

# What is Paediatric Palliative Care Workshop 15<sup>th</sup> March 2024

**Overall Learning Aim:** To confidently care for children with life-limiting conditions, and their families wherever they reside.

**Relevance:** All health professionals in hospital and community services that provide care for seriously ill children and their families.

## Learning outcomes

On completion, participants will be able to:

- understand the differences between paediatric & adult palliative care
- identify the role of the PPC specialty service
- discuss physical, psychosocial, spiritual and emotional aspects of care for the child & their family
- define the role of the generalist health professional
- identify evidence-based resources in PPC
- recognise good communication strategies in PPC.
