

THE CRITICALLY UNWELL PREGNANT PERSON (T-CUPP)

Saturday 7 September 2024

Expert Insights in Managing Challenging Scenarios

PROGRAM OUTLINE

This live interactive online course will bring together a multidisciplinary team of leading experts to provide an intensive learning experience on managing the most common and life-threatening complications during pregnancy. Throughout this comprehensive course, participants will delve into case studies, explore evidence-based practice, and discuss key considerations to ensure optimal care and support for critically ill pregnant people.

TOPICS

The course will cover a broad range of conditions leading to a critically unwell pregnant person, such as:

- Hypertension
- Amniotic fluid embolus
- Respiratory failure
- Maternal collapse
- Sepsis
- Massive haemorrhage
- Acute cardiac complications
- Neurological catastrophes

WHO SHOULD PARTICIPATE?

The course is intended for a broad audience, including Obstetricians and Obstetric Trainees, Obstetric Medicine Physicians, GP Obstetricians, Intensivists, staff providing Critical Care, Nurses and Midwives.
